Seaside Delight

Past the lavender hedge you will find this rammed earth brick and cedar cottage. The property is in a quiet elevated position, with ocean views from the rear of the property. It is a perfect place to escape.

Inside you will find a downstairs lounge/dining area with a huge galley style kitchen. Theres also a pantry and broom cupboard. Country style blinds and valances frame the view of the front yard.

The downstairs bedroom is large and could be ultimately split into two to make this a three bedroom house. There is a large built in wardrobe. The downstairs bathroom has a vanity, shower and toilet.

Upstairs there is an a-framed living area with timber look floors, which leads onto the timber balcony. This is great spot either inside or outside to sit and watch the sun set in
