INVEST IN THE BEST

This display home is a very fresh, very contemporary design that combines an eclectic mix of finishes - glass, painted render and custom orb - to create a memorable facade that you'll be proud to call home. Step inside and things get even better.

A covered porch leads to a classic lobby featuring a high coffered ceiling and direct access to the double garage. To your right are the secondary bedrooms and bathroom. Here the designers have created a separate environment for the kids with each room clustered around a central computer nook that everyone can use, and each room has a built-in robe.

Venture on into the main living area and prepare to be impressed - the kitchen is a chef's delight, beautifully equipped with all the latest stainless steel appliances, a large breakfast bar, overhead cupboards, walk-in pantry and more bench and storage space than you can imagine.
